

Geomorphology 3200/5200

Assignment I due 30 August

Please describe what you observe in each photograph, and answer any associated questions presented. The purpose of this exercise is to get you thinking & to establish a baseline of how you think about landscapes.
HINT: don't stress or google. Simply react.
Each photo is labelled with a number on the top right side.

Discuss this area, its processes, formation, and weathering.

1

HINT: This is a standard photograph.

- **What are the dominant weathering and erosional processes evident in this photo?**
- **Specifically discuss the origin of the feature in the foreground with the water in it.**

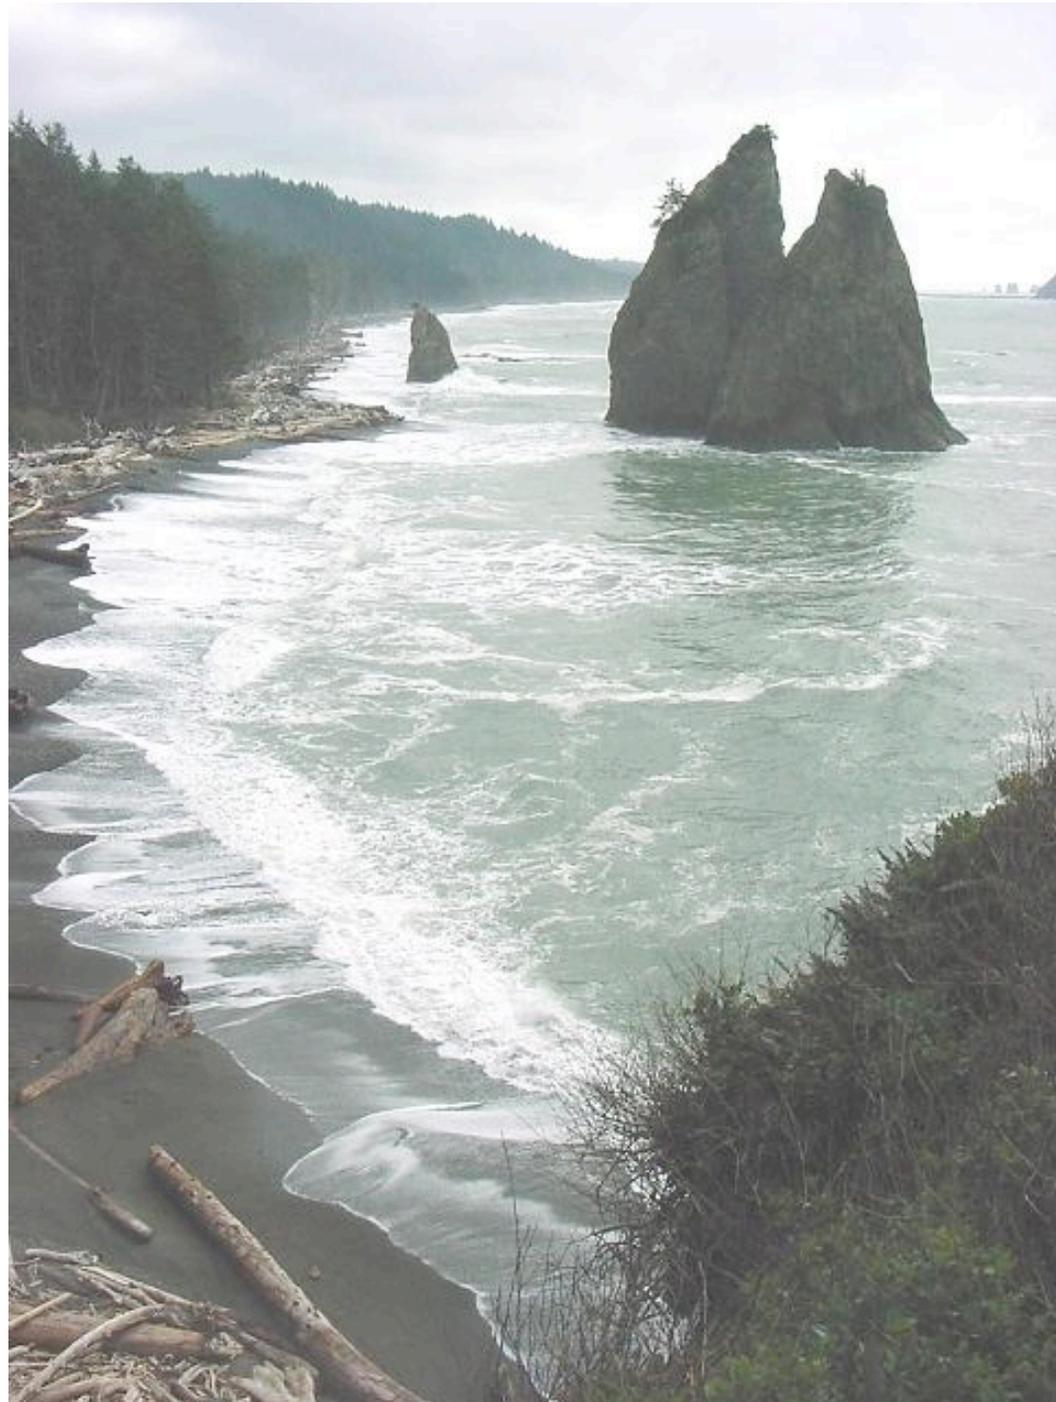

4

*Image is a
DEM from
