

TABLE OF CONENTS

Preface	vi
The Clay Minerals Society	vii
Learning Theory and National Standards Applied to Teaching Clay Science Audrey C. Rule	1
Using a Discrepant Event to Teach the Coagulation and Flocculation of Colloids Shobha B. Parekh and Audrey C. Rule	21
Cooperative Learning Techniques: Applications to Clay Science Stephen Guggenheim and Sharon Kane	45
Rubrics in Teaching Assessment Richard W. Berry	59
Using Analogies to Enhance Learning in Clay Science Audrey C. Rule	71
Kaolin Mineralogy and Commercial Utilization Jessica Elzea Kogel and Audrey C. Rule	93
Use of Multimedia to Enhance Clay Mineralogy Laboratory Activities Ray E. Ferrell, Johan Forsman, and Wanda S. LeBlanc	121
Determination of illite crystallite thickness distributions by X-ray diffraction, and the relationship of thickness to crystal growth mechanisms by the use of MudMaster, GALOPER, and related computer programs D. D. Eberl	131
An Introduction to the Analysis of Clay Minerals by Laser and X-ray Diffraction Techniques Stephen Guggenheim	143
Interlayer Reactions in Expandable Clays: Exchange, Solvation, and Intercalation Experiments Brenda Ross and Stephen Guggenheim	161
Infrared Spectroscopy in Clay Science Paul A. Schroeder	181
Structure and Chemistry of Clay Minerals: Learning through Application Jean Hemzacek Laukant	207

roduced by any mechanical,
photographic recording, nor
otherwise copied for public
blisher.
