Pair programming: Peer evaluation form

The purpose of this evaluation form is to provide me with some information as to your experience with pair programming. Specifically, I would like you to give me an honest appraisal of the work that both you and your partner(s) did on your pair programming assignments. Providing an honest appraisal of peers is difficult, but important. This is the only way for me to really know how balanced the contribution was, and helps me better assign future partners. Your honest feedback is vital and appreciated!

Please copy and paste the questions below into a text editor. Fill in your answers to the questions, and submit them via this Moodle page. I will treat your responses as confidential information, except where otherwise indicated, and not share them with anyone else in the class. **Please submit your responses by Tuesday, 18 October by 9:00am.**

If you are in a group of three students, any questions about "your partner" should be answered separately for each partner.

1. List your name and your partner's name.
2. Provide a short summary of **your** contributions to the assignments. Did you contribute a fair share of the work?
3. Provide a short summary of **your partner's** contributions to the assignments. Did your partner contribute a fair share of the work?
4. When working together, what percentage of the time would you estimate that you spent "driving" at the computer? What percentage of the time did your partner spend "driving" at the computer? (These should add up to 100%.)
5. Pair programming should be done with both of you at the computer at the same time, working together. Did it work out this way? That is, did you and your partner work entirely together side-by-side for the assignments that you turned in? Did you or your partner do any of the work on your own?
6. Is there anything else that I should know about the general experience of pair programming, or how you and your partner worked out?
7. **Non-confidential question:** Is there any feedback you can provide about your partner that I can share, if the need arises? You should feel completely free to leave this section blank if you wish. Alternatively, if you want some constructive feedback about your partner to make its way back through me, this is the place to indicate it.
