TUESDAY – WHAT IS OUR IMPACT?

Since the Industrial Revolution, humans have been the biggest contributor and accelerator of climate change. One of the biggest ways we contribute is through burning fossil fuels and depleting forests. Today, students will investigate how their choices impact climate change.

Who cares
from Connect4Climate PRO

WHO CARES

— a portrait of climate change seen by a young man

04:58

HD vimeo

In this documentary, *Who Cares*, from Connect4Climate's film competition, a student discusses his impact on the environment and how he can make changes in his every day life to make a larger difference.

Grades K-4

Follow That Water!

Kids see how water moves through a landscape, and how people affect aquatic ecosystems.

Climate Bingo

In this game kids get to be on the lookout for things that are good for our environment or that can help reduce global warming.

Grades 5-8

How Cheeseburgers Impact the Ocean

In this activity, students examine the energy required to make a cheeseburger, calculate its associated carbon footprint, and discuss the carbon emissions related to burger production.

Carrying Water

Students will audit their personal daily water usage, and will participate in a class discussion about water use and conservation, and how climate change will affect future water use.

Climate Education Week, April 18-25

Day	Theme	Day	Theme
Saturday <i>April 18</i>	Explore the Outdoors	Wednesday <i>April 22</i>	Earth Day: Take Action!
