Bali Principles of Climate Justice

20 August 2002

Whereas the impacts of climate change threaten food sovereignty and the security of livelihoods of many millions of people and ecosystems, and the rights of indigenous peoples and other vulnerable communities to their lands and territories.

Bali Principles of Climate Justice

1. Affirming the success of Mother Earth, ecological equity and the interdependence of all species, Climate Justice demands that all regions in the world sustain healthy ecological flows from climate change, its related impacts and other forms of ecological destruction.

2. Climate Justice affirms the need to reduce with an aim to eliminate the production of greenhouse gases and other local pollutants.

3. Climate Justice affirms the rights of indigenous peoples and affected communities to represent and defend these rights.

4. Climate Justice affirms that the governments are responsible for addressing climate change in a manner that is both environmentally sustainable and in line with the principle of common but differentiated responsibilities.

5. Climate Justice affirms that the principle of sustainable development must be embedded in the international processes to address climate change.

6. Climate Justice affirms the rights of indigenous peoples and communities to participate in climate change negotiations and other forums, as well as to have their voices heard at the highest levels of international decision-making.

7. Climate Justice affirms the role of civil society organizations and networks of peoples and communities in experiencing and addressing the impacts of climate change.

8. Climate Justice affirms the right of all individuals and communities to determine their own destiny and to control their own resources.

9. Climate Justice affirms the rights of indigenous peoples, women, and small island states.

10. Climate Justice affirms the right to an international legal framework that provides for the rights of people and the environment that are affected by climate change.

11. Climate Justice affirms the need for international commitment to the principle of sustainable development.

12. Climate Justice affirms the need for international commitment to the principle of sustainable development.

13. Climate Justice affirms the need for international commitment to the principle of sustainable development.

14. Climate Justice affirms the need for international commitment to the principle of sustainable development.

15. Climate Justice affirms the need for international commitment to the principle of sustainable development.

16. Climate Justice affirms the need for international commitment to the principle of sustainable development.

17. Climate Justice affirms the need for international commitment to the principle of sustainable development.

18. Climate Justice affirms the need for international commitment to the principle of sustainable development.

19. Climate Justice affirms the need for international commitment to the principle of sustainable development.

20. Climate Justice affirms the need for international commitment to the principle of sustainable development.
Environmental Justice demands the right to participate as equal partners at every level of decision making, including needs assessment, planning, implementation, enforcement and evaluation.
Stories From Our Mediterranean Climate Brothers and Sisters

PROJECT DESCRIPTION

To create a video series of stories and conversations that outline the pressing food and climate justice issues that should be covered at COP27. The format will consist of weekly, 15-min live video conversations with food system actors working on ambitious food and climate projects. The objective is to center food systems in conversations about climate change in order to advocate for a food and climate nexus and solutions. There will be 1-2 live video interviews per week on Instagram throughout the month of October.

Stories From Our Mediterranean
Climate Brothers and Sisters

Which countries, cultures and communities are being most impacted by climate change?

How do our food choices and agricultural systems connect to the climate crisis?

What can we learn about environmental justice from other parts of the world?

What can we learn from other cultures about how to solve the climate crisis?

Drought

Bay Area Climate Institute 2022
SANTIAGO, Aug 10, 2021 (Reuters) - A punishing, decade-long drought in Chile has gone from bad to worse due to a scorching July, a month which typically brings midwinter weather showering the capital Santiago in rain and snow.

But a lack of precipitation this year has left the towering and typically snowcapped Andes above the city mostly bare, reservoir levels low and farm fields parched. The scenes, government officials say, are clear evidence of global warming.

How is the drought impacting the different communities in Chile?

What are they doing to adapt?
The 2019–20 Australian bushfire season, also known as the Black Summer, was a period of unusually intense bushfires throughout Australia.

Opportunities for online engagement

Part of the trick of making sense of all the activity at a COP is to find what the various groups attending the conference are doing. To that end this section contains links to gateways produced by a number of groups in attendance. Many of these gateways provide direct links to live-streamed and/or recorded events of interest to these groups. This section also contains links to events leading up to the COP put on by the UNFCCC or other groups.

The gateways are grouped by constituency and informal grouping to make it easier to find something of interest to you or the group you are representing. A constituency is a collection of non-governmental organizations (NGOs) loosely affiliated by common interests or perspectives. Nine constituencies have been recognized by the UNFCCC secretariat. Informal groupings are subsets of these constituencies.

**General**

- **Climate Action Studio (2022 / 2021)** - A You-tube channel of speakers at COP26 and pre COP27 meetings.
- **Climate Action Studio (2019 and before)** - A You-tube channel of speakers at COP25, 24, and 23.
- **COP27 Coalition** - A Coalition of Egyptian, African, and Arab Civil Society Groups focusing on elevating Global South voices for climate justice during the upcoming COP.
- **COP Civic Space** - The Egyptian Human Rights Coalition on COP27
- **New York Times Climate Hub** - Nine days of events broadcast from Glasgow and organized by the New York Times (3 - 12 November)
- **US Climate Action Center** - A project of America is All In that has both a physical presence at COP26 and provides an avenue for virtual participation.

**Constituency: Business and Industry (BINGO)**
