Under Construction!
EE Guidelines for Empowering Climate Action
Under Construction: Climate Change Guidelines

Bora Simmons – National Project for Excellence in Environmental Education

Anne Umali – NAAEE Director of Professional Development

Frank Niepold – NOAA, Climate Education Senior Program Manager
Agenda

- Quick introduction to NAAEE’s *Guidelines for Excellence*
- Overview of the development of our newest set of *Guidelines*
- Chance to provide input
- Questions
In the chat:

How well do you know the Guidelines for Excellence?
NAAEE’s influence stretches across North America and around the world!

**Our Vision**
A just and sustainable world where environmental and social responsibility drive individual, institutional, and community choices.

**Our Mission**
To use the power of education to advance environmental literacy and civic engagement to create a more equitable and sustainable future. We work with educators, policymakers, and partners throughout the world.

- Members in more than 30 countries.
- 56 state, provincial, and regional Affiliate organizations
- 20K members across many sectors of society.
Primary Sponsor

ee360+

U.S. EPA Office of Environmental Education
More Partners

- U.S. Forest Service
- U.S. Fish and Wildlife Service
- State and Provincial EE Associations
- Organizational partners – such as Keep America Beautiful, Project Learning Tree, Arbor Day Foundation, Project WILD, Project WET
Six Primary Products

- Instructional Materials Guidelines
- K-12 EE Guidelines
- Professional Development of Environmental Educators
- Environmental Education Programs
- Early Childhood Environmental Education Programs
- Community Engagement
Our Collective Wisdom

- Developed *Guidelines* through a public participatory process
- Engaging educators in a deep discussion about quality environmental education practice
- Building EE as a profession
Excellence

Promoting excellence in environmental education
Under Construction: Climate Change Guidelines

- Conducted background research
- Engaged thought leaders
Meet the Team

Curtis Bennett – National Aquarium Baltimore

Zakhia Grant – EcoRise

Kathayoon Khalil – New England Aquarium

Lindsey Kirkland – Climate Generation

Jen Krester – The Wild Center

Gus Medina – Environmental Education Conservation Global

Taylor “Beau” Morton – WE ACT for Environmental Justice

Frank Niepold – NOAA

Martha Monroe – University of Florida

Sheila Williams Ridge – University of Minnesota
Expert Review

Aaron Ambroso – Co-Founder, Climate Justice Museum

Amara Ifeji – Director of Youth Engagement, Maine Environmental Education Association

Charissa Jones – Outreach & Inclusion Coordinator, Oregon State University
Advisory Committee

- Aaron Ambroso
- Brock Adler
- Megan Bang
- Sarah Bodor
- Patty Born Selly
- Judy Braus
- Ellen Ebert
- Bill Finnegan
- Michael Heinze
- Charzy Jones
- Taiji Nelson
- Kim Noble
- Ginger Potter
- Dejah Powell
- Sarah Schoedinger
- Billy Spitzer
- Sarah Stapelton
- Daniel Wildcat
- Andra Yeghoian
Framing Our Newest Set of Guidelines

In the chat, complete this sentence:

This set of guidelines should provide recommendations for climate education that centers on/focuses on/facilitates….?
Our Newest Set of Guidelines…

…will provide recommendations and resources for developing effective educational efforts that empower climate action.
Our Newest Set of Guidelines…

…will provide guidance on how to develop community-driven, climate change education that centers on climate justice and climate science.
In the chat:

- List three “types” of individuals who might be involved in facilitating climate learning opportunities that empower climate action?
In the chat:

✓ List three places or settings where climate education activities might take place?
Who should use this set of guidelines?

A broad range of individuals and organizations interested in using education, in its different forms and in its varying settings, to work with communities to find climate solutions.
Who should use this set of guidelines? Where should they be used?

Five Key Characteristics

Education that is part of the process that successfully empowers climate action has these characteristics in common:

1) Climate Justice at Its Core
2) Climate Systems at Its Core
3) Locally Focused and Community Driven
4) Facilitates Civic Engagement for Climate Action
5) Education for Climate Action – Instructional Strategies
KEY CHARACTERISTIC #1: Climate Justice at Its Core
Effective climate action relies on an understanding of climate justice and the importance of protecting vulnerable communities, as well as a willingness to work toward just solutions to address the impacts of climate change.

1.1 Uneven distribution of impacts – Recognize that climate change impacts are unevenly distributed across communities, regions, and the world — even within a single community, the consequences of climate change can differ among neighborhoods and individuals.

*Indicators:*
- Understand that long-standing socioeconomic inequities (e.g., healthcare, racism, housing, food insecurity) can make minoritized, historically neglected, and historically marginalized groups, who often have the highest exposure to hazards and the fewest resources to respond, more vulnerable to climate change.
- Investigate why groups like the NAACP and the United Nations argue that environmental justice and climate justice are civil and human rights.
- Recognize that not everyone contributes to climate change equally or in the same way.

In addition...

**Community Engagement: Is It Right for Your Project?**

All projects are not alike, and not every endeavor will benefit from extensive community engagement. Community engagement should be authentic, matching the form of engagement to the actual role the community will play. See Resource #5, page 94, Designing Civic Engagement, for help determining your goals, which may range from simply informing participants (one-way communication), to consulting or involving participants, all the way to full partnerships.

Projects are especially likely to benefit from more comprehensive, collaborative engagement if one or more of the following factors apply:

- **Complexity**: The topic you are addressing is difficult to understand, values-based, or controversial.

  Successful participation will help the community understand issues better, and will allow the project to benefit from an array of perspectives.

- **Size and Diversity of Stakeholder Group**: Your project will impact a large or diverse group. A stakeholder is anyone who can affect, or who will be affected by, your project.

  More interactive types of engagement are helpful if you are still in the process of defining the stakeholder group, or if you know there is a wide array of stakeholders.

- **Balance of Power**: There is a pre-existing imbalance of resources or decision-making authority among stakeholders.
From what you’ve seen...

- What are the strengths? What do you like?
- What else would you include?
- What causes you heartburn? What troubles you?

*Education that successfully empowers climate action has these characteristics in common:*

1) Climate Justice at Its Core
2) Climate Systems at Its Core
3) Locally Focused and Community Driven
4) Facilitates Civic Engagement for Climate Action
5) Education for Climate Action – Instructional Strategies
Our Collective Wisdom: Timeline

FEBRUARY – MARCH 2023
- Post first draft for review and gather input

MARCH – JUNE 2023
- Synthesize comments
- Writing Team input
- Revise

JULY/AUGUST 2023
- Post revised draft for comments
- Gather input
