CURE Entry – By 10 am tomorrow

By 10 am tomorrow, you should have drafts of the following elements of your CURE entry ready for preliminary feedback:

- Title

- 2 research goals

- 3 student goals

- CURE design, including how you will structure the CURE to maximize equity

- At least 1 (ideally more) set of objectives aligning student and research goals

- 1 example lesson, assignment, guidelines – what specifically will students do to make progress toward achieving objectives?

- 1 example assessment tool – how will you know students are achieving objectives?

- Instructional staffing

Tomorrow we will share drafts through a sort of online poster session
