

The Department of Geography at California State University, Long Beach, invites you to consider majoring or minoring in Geography and/or doing a certificate in GIScience or in Urban Studies.

Why Geography @ the Beach?

- **a real sense of community** (friendly, accessible faculty and a very active group of students who take tours and trips together and host parties)
- **field experiences** (many classes get you out of the classroom to experience the natural environment and the urban landscape)
- **a mini-international exchange program with the University of Salzburg, Austria** (students here and there work on service-learning projects and visit one another for 2 weeks each)
- **internship program** (including a "Jobs in Geography" colloquium series)
- **a NASA Regional Earth Science Applications Center** (one of only seven in the country, our Southern California Wildfire Hazard Center applies remote sensing and GIS to chaparral fires)
- **MapLab** (does contract mapping, GPS, field work, and GIS analysis for local cities and county and State agencies)
- **award winning faculty** (Fulbright scholars, disciplinary honors, Who's Who in America)
- **award winning students** (prizes at conferences, scholarships, honor society initiations)

What can you learn if you major in Geography at CSULB?

- **geospatial technologies and methods**, including GIS, remote sensing, map-making, statistics, qualitative methods, field techniques
- **environmental and physical geography**, including hazards, hydrology and water resources, biogeography, climate and environmental change, and arid lands
- **human geography**, including economic geography, urban cultural and historical geography, social geography, and medical geography
