

## Climate, Weather, and Plants Recording Sheet

Name of observer:

Date and time of observations:

Description and location of study site: (be as specific as possible)

Plant observations: (include photo if possible)

- Plant type (tree, shrub, cactus, etc)
- Description of plant (size, age, health)
- Growing conditions (soil type, nearby objects)
- Plant name (if known)

Weather observations: (include photo if possible)

- Temperature
- Precipitation
- Cloud cover
- Humidity
- Wind Speed and Direction

Stop and Think:

1. Write a paragraph describing how you predict the weather in your study area will change over the next day, week, and month.

2. How will the plant change in these time same time periods? You may want to sketch your predictions for plant growth or change.
