Speed Dating
Networking and Icebreaker event

Join us to meet other folks interested in Geoscience Education, form new partnerships and collaborations, and have fun!

Location: Centennial Ballroom B - Hyatt Regency
Time: Sunday, September 25 — starting at 7:30 p.m.

Brought to you by the Divisions of NAGT:
- Geoscience Education Research Division (GER)
- Teacher Education Division (TED)
- and Two-Year College Division (2YC)

About the NAGT Divisions

In 2011, the National Association of Geoscience Teachers organized three divisions around topics of common professional interest. Descriptions of each of these divisions can be found below, and leaders of each division will be available at the reception to answer any questions you might have about division activities and how to join. Learn more by visiting us on the web at http://tinyurl.com/NAGTDiv

Geoscience Education Research (GER): This division provides networking and professional development for the growing community of geoscience education researchers and to help build relationships between GER, the geosciences, the NAGT Council, and the larger discipline-based science education research community.

Teacher Education (TED): This division provides a forum to discuss ideas and resources about geoscience teaching, the improvement of instruction for teachers and teacher educators, and to advocate for teacher education to the NAGT Council and the geosciences community.

Two-Year Colleges (Geo2YC): This division supports geoscience educators and education at two year colleges, as well as advocating for two-year college concerns to both the NAGT Council and to the geosciences community.
