

# CUAHSI services for water education community

A part of NAGT-CUAHSI joint webinar series

# Webinar description

The webinar will provide an overview of the **Consortium of Universities for the Advancement of Hydrologic Science, Inc. (CUAHSI)** to the NAGT community. Topics to be covered include **CUAHSI's Data and Computer Services for discovering, sharing, archiving, and publishing water-related data** and other resources such as geologic information. In addition CUAHSI's services for **enabling reproducible workflows and code sharing through Jupyter notebooks** will be reviewed, as well as computational services. Finally, CUAHSI's services for **supporting education and outreach to the community** will be discussed. A *representative for a CUAHSI member institution will discuss ways in which her Geology department has benefited from CUAHSI's educational and data services.*

# Thank you for joining us!

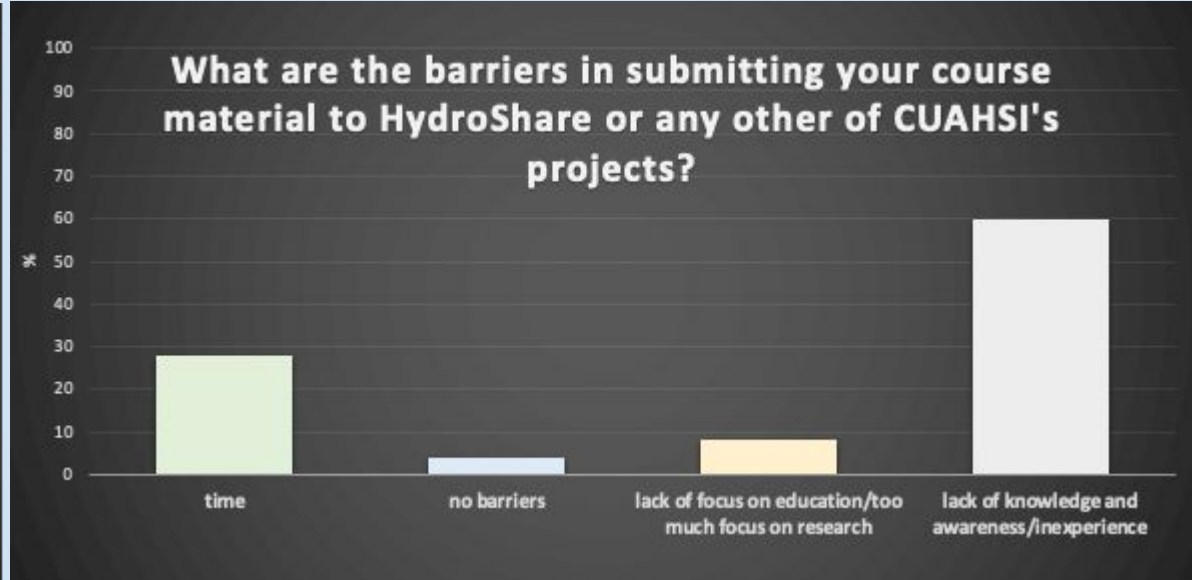

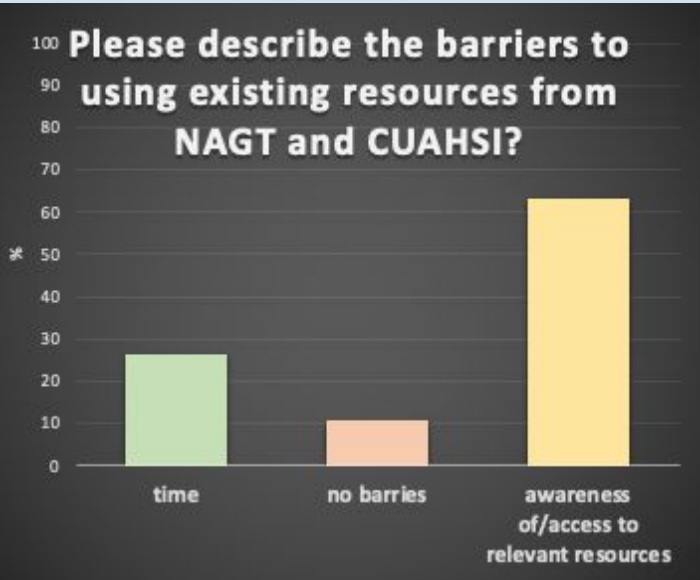

Agenda:

**Jerad Bales:** CUAHSI Executive Director

**Anne Jefferson:** Associate Professor, Department of Geology, Kent State University; CUAHSI Board of Directors member

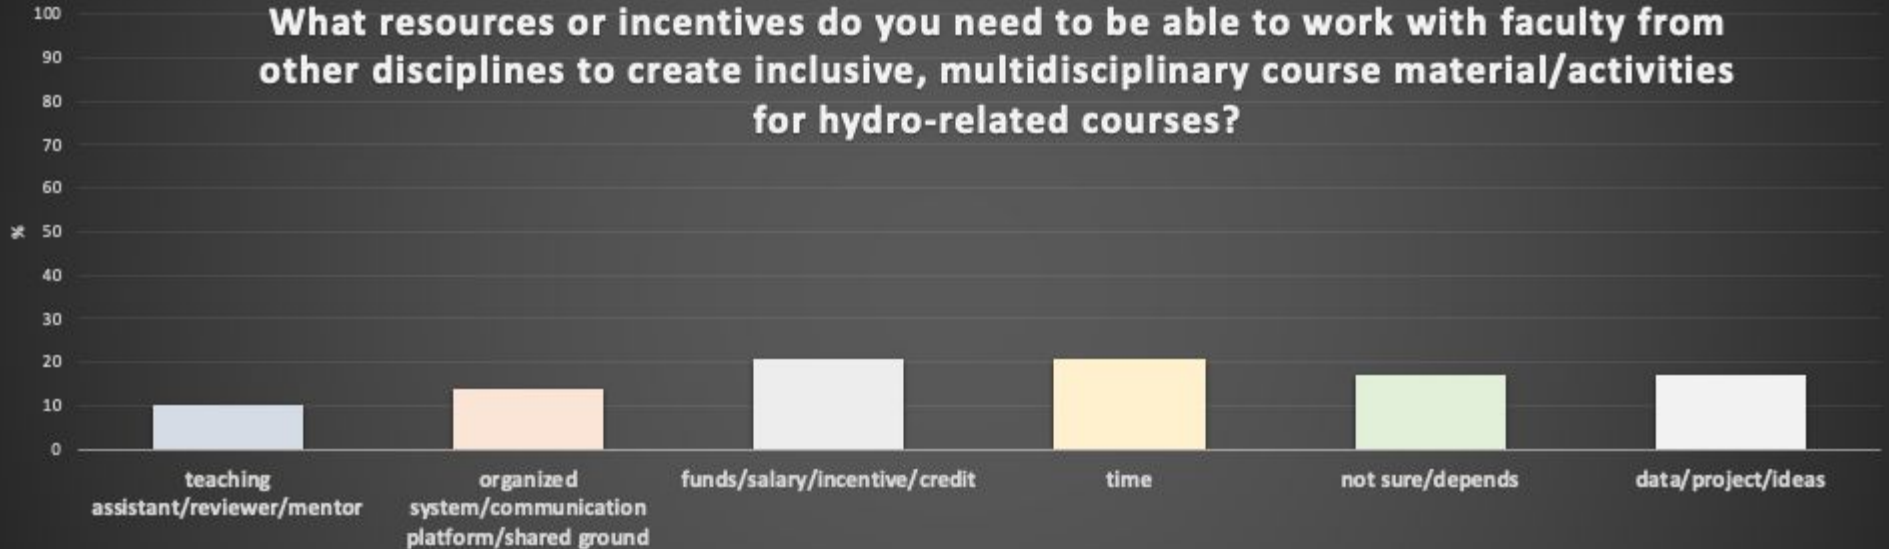

**Discussion**

# Survey results and Discussion

# Survey results and Discussion

**What resources or incentives do you need to be able to work with faculty from other disciplines to create inclusive, multidisciplinary course material/activities for hydro-related courses?**

# Discussion questions for break out rooms

Overarching question:

**How**

**can NAGT and CUAHSI combine forces to help you use their resources in your courses?**

- What can NAGT and CUAHSI do to help with the “time” barrier associated with using their resources?
- What incentives could NAGT and CUAHSI provide to facilitate collaboration between faculty from different disciplines in creation of hydro-related course material?
