

# Geology and Environmental Geosciences

## *What can I do with a geology degree?*

### Use science to solve real-world problems

- Evaluating water quality and contamination.
- Interpreting groundwater flow.
- Using geophysics to find buried, hazardous fuel tanks.
- Using fossils, lake cores and tree rings to understand climate change.
- Integrate geology, physics, chemistry and 3D thinking to find natural resources.
- Teaching high school science.

### What is special about NIU?

- Undergraduate research experiences.
- Hands-on training in environmental field techniques.
- Geologic mapping in South Dakota and Wyoming.
- HAZWOPER training.
- Geology Club and Honors Society.
