

A one pound oowie gooie super-extra sticky globular gelatinous glue ball travelling at one foot per second smashes into a second one pound oowie gooie super-extra sticky globular gelatinous glue ball at rest and **SURPRISE!!** they stick together. What is the speed of the two pound ..... GLOB, after the collision?

a) Zero ft/s

b) one-quarter of one ft/s

c) one-half of one ft/s

d) one ft/s

e) two ft/s

f) Not enough info.
