

Bernoulli's Balloons

Zinger #19

Name _____

1. When air is blown between the balloons, is it moving faster or slower than the air on the outside of the balloon?

2. Does the air pressure on the outer sides of the balloons change at all?

3. Does the air pressure on the inner sides of the balloons change?

4. Why do you think the balloons move toward each other instead of away from each other?
