

Policy Research & Writing

A course to introduce students to the issues and methods of analyzing public policies and regulations. This course will provide students with a “tool kit” of practical methods for analyzing public policy issues by developing policy research and modeling skills that considers complex, real-world issues involving multiple actors with diverse interests, information uncertainty, institutional complexity, and ethical controversy.

- Modules:
 - Public policy analysis
 - Public policy regulations
- Course level:
 - PhD students and postdocs in life sciences and humanities disciplines
- Options for resulting products:
 - “Toolkit” of practical methods to analyze public policy issues
