

Activity Model for Inquiry

Make Observations
South America and Africa
coastlines appear to fit.

Define Problem
Why do the coastlines
fit like a puzzle?

Form Question
How does the Earth's
surface change?

Investigate Known
Has anyone else
reported on this
idea?

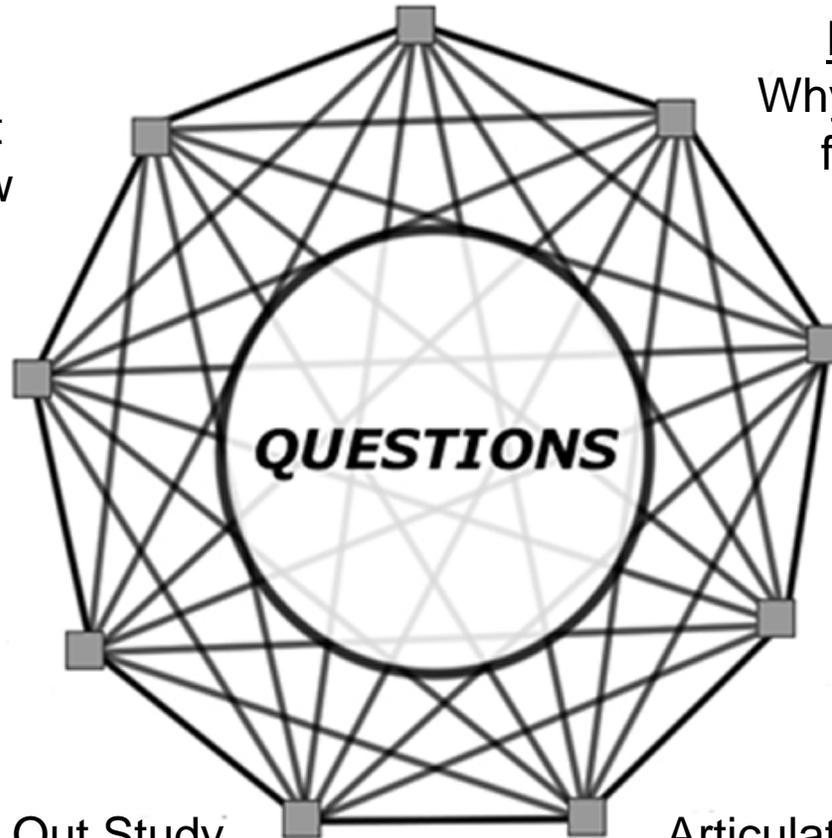

Articulate Expectation
South America and Africa
were once next to each other.

Carry Out Study
Collect data

Examine Results
What does the data
tell us?

Reflect on Findings
Does the data support
our expectation?
Are there other
explanations?

Communicate
Write or present
results for review
